SUMMARY

Product Analyst and customer-facing product professional with 3+ years across healthcare and industrial technology, turning operational data into Power BI dashboards, JIRA-driven delivery, and customer onboarding workflows. Cut reporting turnaround 20%, onboarded 500+ enterprise clients, and dropped recurring production incidents 30% as Jr Product Manager / Coordinator at Detect Technologies.

Master's in Management Information Systems (GPA 3.9, completed Oct 2025) focused on business intelligence, systems analysis, and process optimization. Comfortable working across product roadmapping, KPI frameworks, Agile/Scrum delivery, HIPAA-aware healthcare data workflows, and customer success enablement.

WORK EXPERIENCE

Product Analyst

Dec 2025 - Present

Hines & Associates - Houston, TX - Healthcare utilization management & care coordination services

- Audited operational workflows and recommended targeted improvements that reduced reporting turnaround time by 20%.
- Partner with clinical and operational stakeholders to gather, document, and prioritize product requirements for healthcare workflow and data management initiatives.
- Develop and maintain interactive Power BI and Excel dashboards tracking key operational KPIs - patient throughput, service utilization, and process compliance - across multiple departments.
- Conduct structured analysis of healthcare datasets to surface trends, identify process inefficiencies, and deliver actionable insights supporting senior leadership decision-making.
- Translate complex business and clinical requirements into detailed user stories, acceptance criteria, and functional specifications consumed by engineering and development squads.
- Facilitate requirements workshops, sprint reviews, and stakeholder walkthroughs to keep product goals aligned with technical delivery timelines.
- Maintain comprehensive HIPAA-aware product documentation - process flows, data dictionaries, and sprint artifacts - in Confluence and SharePoint.

Jr Product Manager / Coordinator

Jan 2021 - Jul 2023

Detect Technologies - Chennai, India - Industrial AI and IoT inspection platform

- Spearheaded end-to-end delivery of 20+ digital deployment projects, coordinating cross-functional teams across product, engineering, and operations to meet client SLAs and governance standards.
- Designed and rolled out onboarding workflows for 500+ enterprise clients, standardizing platform configuration and documentation and cutting onboarding cycle time by 20%.
- Managed full product backlog lifecycle - epic creation, story mapping, sprint grooming, planning, and retrospectives - in JIRA and Confluence, maintaining clear acceptance criteria for each deliverable.
- Built executive Power BI and Excel dashboards monitoring SLA compliance, system uptime, and ticket closure rates - improving reporting frequency and management visibility by 25%.
- Maintained RAID logs and dependency matrices in JIRA; proactively surfaced blockers and coordinated escalation paths, cutting recurring production incidents by 30%.
- Led daily stand-ups, stakeholder syncs, and post-release retrospectives; produced MoM documentation to track decisions and action items across distributed teams.
- Automated recurring reporting workflows using Microsoft Copilot and Power Automate, saving 15+ hours of manual effort per month.
- Managed vendor relationships and aligned third-party deliverables to product timelines, negotiating scope adjustments with minimal schedule impact.

SKILLS

Product Management: Product Roadmapping · Backlog Prioritization · User Stories · PRD Writing · Feature Prioritization · Go-to-Market · Product Lifecycle Management

Project Management: Agile / Scrum · Waterfall · RAID Logs · Milestone Tracking · Risk Management · Resource Planning · Stakeholder Reporting · Change Management

Data & Analytics: Power BI · Tableau · Excel · SQL / MySQL · KPI Development · Cohort Analysis · Root-Cause Analysis · Data Modeling

Healthcare Domain: Healthcare Workflow Analysis · Patient Data Reporting · Operational KPIs · HIPAA Awareness · Clinical Stakeholder Engagement · EHR / EMR Familiarity

Customer Success: Client Onboarding · Adoption Metrics · Salesforce CRM · UAT Coordination · Technical Support Coordination · Customer Requirements · Stakeholder Follow-ups

Technical Tools: Python · AWS (S3, EC2) · JIRA · Confluence · Salesforce CRM · SharePoint · Postman · Git / GitHub

AI & Automation: ChatGPT · Microsoft Copilot · Power Automate · Workflow Optimization · Process Reengineering

Soft Skills: Executive Reporting · Cross-functional Collaboration · Customer Empathy · Problem Solving · Storytelling · Vendor Management

EDUCATION

MS, Management Information Systems (GPA 3.9)

Aug 2024 - Oct 2025

Lamar University - Beaumont, TX - Focus: Data Analytics · Business Intelligence · IT Operations · Systems Analysis

MS, Computer Science (1 year, transferred)
University of Houston - Clear Lake - Houston, TX - Transferred to MS MIS for product, BI, and systems-analysis focus.

BE, Computer Science (CGPA 7.23 / 10)
New Horizon College of Engineering - Bangalore, India

Aug 2023 - Aug 2024

Aug 2016 - May 2021

PROJECTS

Health Network Risk Management & Continuity Plan (BIA / BCP) 2025 - Lamar MIS

Built a risk-assessment matrix and ran a business-impact analysis on critical clinical and IT functions; produced a structured BCP / BIA documentation kit covering recovery considerations and stakeholder communication.

EV vs Gas Emissions Sustainability Analysis 2024

Analyzed lifetime emission datasets across electric and gas vehicles and built interactive Excel and Tableau dashboards delivering sustainability insights for stakeholder presentations and coursework.

CERTIFICATIONS

Microsoft Power BI Data Analyst - Microsoft, 2025 | Salesforce Business Analyst Certification Path - Salesforce, 2025 (all modules completed)
AWS Cloud Practitioner Essentials - Amazon Web Services, 2024 | Google Project Management Certificate - Coursera / Google, expected 2026
