

BINGI CHANIKYA VENKATA MANIDEEP

PROGRAM MANAGER | Cross-Functional Delivery | Process Improvement
Houston, TX | +1 3464347973 | manideep2330@gmail.com | manideep2330.github.io

SUMMARY

Program Manager with around 4 years of experience coordinating digital deployment projects, cross-functional teams, and stakeholder priorities from planning through completion. Managed 20+ deployments with a focus on scope, delivery commitments, risks, and dependencies. Improved onboarding for 500+ enterprise clients and strengthened execution through stakeholder coordination, issue escalation, and reporting automation.

WORK EXPERIENCE

Softech Technology Group, Inc.

Jan 2026 - Present

Project Coordinator

Remote

- Own delivery of a defined feature set from problem definition through release and adoption measurement, coordinating work across the delivery lifecycle.
- Develop product requirements, user stories, and acceptance criteria that clarify scope and deliverables for engineering and design teams.
- Identify AI and automation opportunities in customer workflows; define data inputs, expected model behavior, failure modes, and user controls for delivery.
- Apply AI tools to research synthesis, concept prototyping, requirements drafting, and customer feedback analysis; share effective practices with the wider team.
- Partner with engineering and design in an Agile/Scrum environment to refine backlogs, coordinate execution, and manage scope trade-offs as delivery progresses.
- Prioritize features, bugs, and technical debt; work with the Scrum team to refine competing requirements and add detail needed for execution.
- Conduct customer interviews and usability sessions, translating findings into themes and recommendations that inform requirements and delivery priorities.
- Analyze product usage data to assess problems, prioritize work, and evaluate whether released capabilities achieve their intended outcomes.
- Review API documentation and document data flows and system dependencies to inform integration planning and workflow decisions.
- Contribute to roadmap planning with supporting evidence, clearly framed options, and recommendations for delivery priorities.
- Monitor industry, competitor, and AI technology trends; translate relevant findings into recommendations for product and portfolio direction.
- Coordinate go-to-market and rollout deliverables, including release notes, demos, internal training, and enablement materials for owned features.
- Work across functions to represent internal and external stakeholder groups when developing technical and business requirements.
- Identify improvements to delivery processes and workflows, drawing on an understanding of the company's existing processes and technology.

WORK EXPERIENCE CONTINUED

Detect Technologies

Jan 2021 - Jul 2023*Jr Product Manager / Coordinator**Chennai, India*

- Managed 20+ digital deployment projects from scoping through release, meeting client SLAs and governance standards.
- Coordinated product, engineering, and operations teams to sequence cross-team dependencies and resolve delivery blockers.
- Organized delivery backlogs in Jira and Confluence, including epics, story maps, backlog refinement, and sprint planning.
- Defined acceptance criteria for deliverables to clarify scope and align teams on completion requirements.
- Balanced new feature work against production issues, prioritizing competing requirements with cross-functional teams.
- Maintained RAID logs and dependency matrices; coordinated escalation paths that reduced recurring production incidents by 30%.
- Led stand-ups and stakeholder syncs across distributed teams to align priorities and coordinate project execution.
- Managed vendor relationships and negotiated scope adjustments with minimal impact on project schedules.
- Facilitated post-release retrospectives to review delivery challenges and identify improvements to team processes.
- Standardized onboarding workflows for 500+ enterprise clients, reducing onboarding cycle time by 20%.
- Developed platform configuration standards and client-facing documentation to support consistent onboarding and deployment.
- Automated recurring reporting with Power Automate, eliminating manual steps and saving 15+ hours of effort per month.

SKILLS

- **Program and Project Management:** Project Planning, Cross-Functional Coordination, Stakeholder Communication, Scope Management, Deliverable Coordination, Risk and Issue Management, Dependency Management, RAID Logs, Escalation Coordination, Vendor Management, Agile / Scrum, Sprint Planning, Backlog Prioritization, Process Improvement
- **Requirements and Rollout:** PRDs, User Stories and Acceptance Criteria, Roadmapping, Go-to-Market
- **AI and Automation:** ChatGPT, Microsoft Copilot, Power Automate, Workflow Automation, Process Reengineering
- **Data and Analytics:** SQL / MySQL, Power BI, Tableau, Excel, Python, KPI Development, Cohort and Root-Cause Analysis
- **Tools and Platforms:** Postman (APIs), AWS (S3, EC2), Jira, Confluence, Salesforce CRM, SharePoint, Git / GitHub

EDUCATION

Lamar University

Aug 2024 - Oct 2025*MS, Management Information Systems**Beaumont, TX*

- **GPA:** 3.9

New Horizon College of Engineering

Aug 2016 - May 2021*BE, Computer Science**Bangalore, India*

- **GPA:** 7.23/10
