

BINGI CHANIKYA VENKATA MANIDEEP

Houston, TX | +1 401 903 2586 | bingivenkatamanideep@gmail.com

Technical Product Manager | Product Analyst | Project Manager

SUMMARY

Analytical and results-oriented professional with 4+ years of experience spanning healthcare, technology, and operations. Expertise in translating complex business requirements into scalable product solutions, building data-driven dashboards, and driving alignment across engineering, operations, and executive stakeholders. Hands-on background in Agile/Scrum delivery, product roadmapping, KPI frameworks, and healthcare data workflows. Pursuing a Master's in Management Information Systems (GPA: 3.9, graduating Oct 2025) with a focus on business intelligence, system analysis, and process optimization.

WORK EXPERIENCE

Product Analyst

Dec 2025 – Present

Hines & Associates | Houston, TX

- Partner with clinical and operational stakeholders to gather, document, and prioritize product requirements for healthcare workflow and data management initiatives.
- Develop and maintain interactive Power BI and Excel dashboards tracking key operational KPIs — including patient throughput, service utilization, and process compliance — across multiple departments.
- Conduct structured analysis of healthcare datasets to surface trends, identify process inefficiencies, and deliver actionable insights supporting senior leadership decision-making.
- Translate complex business and clinical requirements into detailed user stories, acceptance criteria, and functional specifications consumed by engineering and development squads.
- Facilitate requirements workshops, sprint reviews, and stakeholder walkthroughs to ensure alignment between product goals and technical delivery timelines.
- Perform gap analysis on existing operational workflows and recommend targeted improvements, reducing reporting turnaround time by approximately 20%.
- Monitor product adoption post-launch, gather user feedback, and coordinate enhancement cycles with development team to continually improve platform usability.
- Maintain comprehensive product documentation including process flows, data dictionaries, and sprint artifacts in Confluence and SharePoint, ensuring HIPAA-compliant data handling.

Technical Project Manager / Product Coordinator

Jan 2021 – Jun 2023

Detect Technologies | Chennai, India

- Spearheaded end-to-end delivery of 20+ digital deployment projects, coordinating cross-functional teams across product, engineering, and operations to meet client SLAs and governance standards.
- Managed full product backlog lifecycle — epic creation, story mapping, sprint grooming, planning, and retrospectives — using JIRA and Confluence, maintaining clear acceptance criteria for each deliverable.
- Defined and documented product requirements and release notes in collaboration with engineering leads, ensuring technical solutions aligned with business objectives.
- Designed and rolled out onboarding workflows for 500+ enterprise clients, standardizing platform configuration and documentation and reducing onboarding cycle time by 20%.
- Built executive-level dashboards in Power BI and Excel monitoring SLA compliance, system uptime, and ticket closure rates — improving reporting frequency and management visibility by 25%.
- Maintained RAID logs and dependency matrices in JIRA; proactively surfaced blockers and coordinated escalation paths, cutting recurring production incidents by 30%.
- Led daily standups, stakeholder syncs, and post-release retrospectives; produced MoM documentation to track decisions and action items across distributed teams.
- Managed vendor relationships and aligned third-party deliverables to product timelines, negotiating scope adjustments with minimal schedule impact.
- Automated recurring reporting workflows using Microsoft Copilot and Power Automate, saving 15+ hours of manual effort per month.
- Documented post-release lessons learned and maintained deployment runbooks, contributing to measurable improvement in release consistency and quality.

SKILLS

Product Management: Product Roadmapping · Backlog Prioritization · User Stories · PRD Writing · Feature Prioritization · Go-to-Market · Product Lifecycle Management

Project Management: Agile / Scrum · Waterfall · RAID Logs · Milestone Tracking · Risk Management · Resource Planning · Stakeholder Reporting · Change Management

Data & Analytics: Power BI · Tableau · Excel (Advanced) · SQL / MySQL · KPI Development · Cohort Analysis · Root-Cause Analysis · Data Modeling

Healthcare Domain: Healthcare Workflow Analysis · Patient Data Reporting · Operational KPIs · HIPAA Awareness · Clinical Stakeholder Engagement · EHR/EMR Familiarity

Technical Tools: Python · AWS (S3, EC2) · JIRA · Confluence · Salesforce CRM · SharePoint · Postman · Git / GitHub · HTML · CSS

AI & Automation: ChatGPT · Microsoft Copilot · Power Automate · Workflow Optimization · Process Reengineering

Soft Skills: Strategic Thinking · Executive Communication · Cross-functional Collaboration · Problem Solving · Presentation & Storytelling · Vendor Management

EDUCATION

Master of Science – Management Information Systems (GPA: 3.9) Aug 2023 – Dec 2025

Lamar University | Beaumont, TX

Focus: Data Analytics · Business Intelligence · IT Operations · Systems Analysis

Bachelor of Engineering – Computer Science 2016 – 2021

New Horizon College of Engineering | Bangalore, India

CGPA: 7.23 / 10

PROJECTS

Healthcare Operational Analytics Dashboard 2026

Product Analyst Project | Houston, TX

- Designed a multi-page Power BI dashboard consolidating patient flow, service utilization, and staffing data to support operational planning at a healthcare organization; automated data refresh pipelines, reducing manual effort by 40%.

EV vs Gas Emissions Sustainability Analysis 2024

Data Analyst Project | Houston, TX

- Analyzed emission datasets across electric and gas vehicles and built interactive Excel and Power BI dashboards delivering sustainability insights for stakeholder presentations and academic research.

Movie Buzz – Android Application 2020

Product Developer | Bangalore, India

- Led product design and full-stack development of an Android movie review platform using Java, Android Studio, and MySQL — managing requirements, UX flows, and delivery milestones from ideation through launch.
